Services and Resources for a Safer Workplace

We all know a safe workplace experiences fewer injuries and lower claim costs. But there are other benefits, too. Well-conceived plans and practices give rise to a culture that supports employee safety and health, a more dedicated workforce, greater employee loyalty, and a solid rep among customers and prospects.

Pinnacol's Safety Services team is here to help your organization optimize safety and health — at no charge — and enjoy the many benefits that follow.

Pinnacol safety services

Pinnacol helps by providing these [services](#):

- **Safety On Call** — Pinnacol's safety consultants are available online and by phone to help with regulations, recordkeeping and employee education, as well as to offer specific suggestions for your program and practices.
- **Safety program development** — Pinnacol can assess your organization's safety needs and find ways to reduce injuries and costs so you have the most substantive, effective safety program.
- **Cost Containment Certification** — Pinnacol can help craft a step-by-step road map to meet Colorado's Cost Containment Certification requirements. This will earn a discount on your organization's workers' compensation premium.
- **Industry trend analysis** — Do your employees get injured on the job? Are the same types of injuries recurring? Pinnacol can unearth trends and use a strategic approach to reducing injuries and claims at your business.
- **OSHA compliance** — Pinnacol keeps up with changing OSHA regulations. And its safety consultants are available to explain what they mean and how to remain in compliance.
- **Industrial hygiene** — Pinnacol's industrial hygienists assess workplace health hazards

such as airborne contaminants and excessive noise, analyze the findings, and partner with you to find solutions.

- **Ergonomics** — A certified ergonomist helps identify and reduce your organization's specific risks for musculoskeletal disorders such as back pain and carpal tunnel syndrome.

Pinnacol resources

Pinnacol's website makes it easy to find [resources](#) that support a safety program and safety practices at your organization. The site organizes materials by hazard and industry and provides helpful forms and templates. Pinnacol Pointers safety videos present short overviews of the most common safety topics. And links make it a snap to find and register for classroom or online training. Additionally, a large online library of free materials is available to your team.

For further information and support, we invite you and your team to contact Pinnacol's Safety On Call at safetyoncall@pinnacol.com, 303.361.4700 or 888.501.4752.
