Target Audience:

Motor Carriers, Drivers, Safety Personnel, Compliance Personnel, Administration Support, Owner Operators, Office Personnel and Driver Trainers.

Companies utilizing pickups with trailers or one ton pickups all the way up to semi tractors and trailers in the furtherance of their business.

Description:

This course is designed to provide instruction of the use of various types of Cargo Securement used by the industry in the shipment of materials, machines, equipment, dunnage, and miscellaneous items. These cargo securement systems are required by the Federal Motor Carrier Safety Regulations and are constantly under strict scrutiny by roadside enforcements officials. Additionally, violations of these rules and regulations can cause increased CSA Safety Scores, extensive down times, fines and penalties, and civil litigation in the event of property loss or damage, and accidents

Objective:

Students will learn the proper methods of cargo securement and cargo securement systems used in the various types cargo and commodity specific items transported daily over America's roadways.
