Cost Containment Certification

Want to save 5% on your workers' comp premium? Get certified.

When you obtain cost containment certification from the state of Colorado, you'll qualify for a five percent discount on your Pinnacol policy premium.

Certification involves implementing a safety program with these six components:

- Safety orientation for all new employees
- Quarterly safety training
- Accident investigation reports for all incidents
- Distribution of designated medical providers list to employees
- Modified duty efforts
- Signed and dated documentation

You might notice you already have some of the program pieces in place. If so, you're off to a good start! To get certified, your program needs to be documented and in place for one year.

Even if you're starting from scratch, Pinnacol is ready to walk you through the six-step process with free certification assistance and an exclusive workbook.
